

2C Metal

2C Metal is a high-quality repair product for quickly repairing or sealing cracks and holes in a variety of materials. 2C Metal is a dual component product, which is mixed by kneading together well.

Surface preparation:

The surface must be clean, dry and free of grease. Clean surfaces with Power Cleaner for best results.

Method of use:

Knead carefully to obtain an even mass. Press to the surface by hand within 3 to 4 minutes. Smooth off with a damp finger or cloth. Can be easily processed after drying, by sawing, filing, drilling, tapping and sanding.

Properties:

- High-quality repair product.
- Very fast curing.
- Dual component product, mixed by kneading.
- Excellent adhesion to many surfaces.
- Resistant to oil, petrol, diesel and solvents.
- Cures after 10 to 15 minutes.
- Can be drilled, filed, tapped and sanded after 1 hour

Because of all these properties 2C-Metal is a product with a wide range of applications that can be used for example to repair worn threads by filling or re-tapping.

2C-Metal is activated by mixing and kneading together both components. The product will be hard after only 10 to 15 minutes.
